

# Erosion & Sediment Control Inspection Certification - March 2015

### What is an erosion and sediment control (ESC) inspection certificate?

An erosion and sediment control inspection certificate is required as evidence that a suitably qualified professional has reviewed the erosion and sediment control construction and implementation for a project and can verify that the construction is in accordance with the certified design, meets current industry best practice techniques and will effectively mitigate sediment migration from the project site.

### When is an ESC inspection certificate required?

For any project assessed as having a 'high' risk according to the Erosion Hazard Assessment form, an ESC inspection certificate is required to be completed and held on site for inspection by Council officers until all exposed soil areas are permanently stabilised against erosion.

### Privacy Statement

The personal information collected on this form will be used by Brisbane City Council (BCC) for the purposes of fulfilling your request and undertaking associated Council functions and services. Your personal information will not be disclosed to any third party without your consent, unless this is required or permitted by law.

## Inspection Certification Details

### 1 Site Information

Application number (if known)

Site address

  
  
 Postcode

### 2 Inspection Details

Date of inspection

 /  / 

The site inspected meets ESC standards, **OR**

The site does not meet ESC standards.

Date of re-inspection (if applicable)

 /  / 

The site was rectified to meet ESC standards (provide details below):

  
  
  
  

### 3 Certifier's Details

Name

Phone number

Company

Address

  
  
 Postcode

RPEQ / CPESC number

### 4 Certification

I certify that:

- I am a person with suitable qualifications and/or experience in erosion and sediment control (RPEQ/CPESC) and I assume responsibility for the detail of this inspection.
- I have inspected all constructed elements pertaining to the erosion and sediment control program and plan and am satisfied no matters of significance have been withheld from me.
- The Erosion and Sediment Control installations meet current industry best practice requirements and will effectively mitigate the potential for soil erosion and sediment pollution to the environment in their as constructed condition.
- I acknowledge and accept that the BCC, as assessment manager, relies, in good faith, on this certification as part of its development assessment process and the provision of false or misleading information to the BCC constitutes an offence for which BCC may take punitive steps / action /enforcement action against me.
